

Application for Faculty Affiliation with the Center for Environmental Chemistry and Geochemistry

Send to: Debbie Lambert, 2217 EES Building

Receipt of an award is not contingent upon being a member of the CECG, but we encourage faculty affiliation. Faculty, staff, and students whose research and teaching efforts are related to the field of environmental chemistry are encouraged to join.

Affiliation allows the CECG to better advertise strengths in environmental chemistry and geochemistry on campus, but does not entail any obligation to submit proposals through the Center. Affiliation with the CECG will also assure you of receiving information on future solicitations, relevant symposia and other activities. More information regarding the CECG may be found on the internet at <http://www.essc.psu.edu/CECG/>
